For Immediate Release

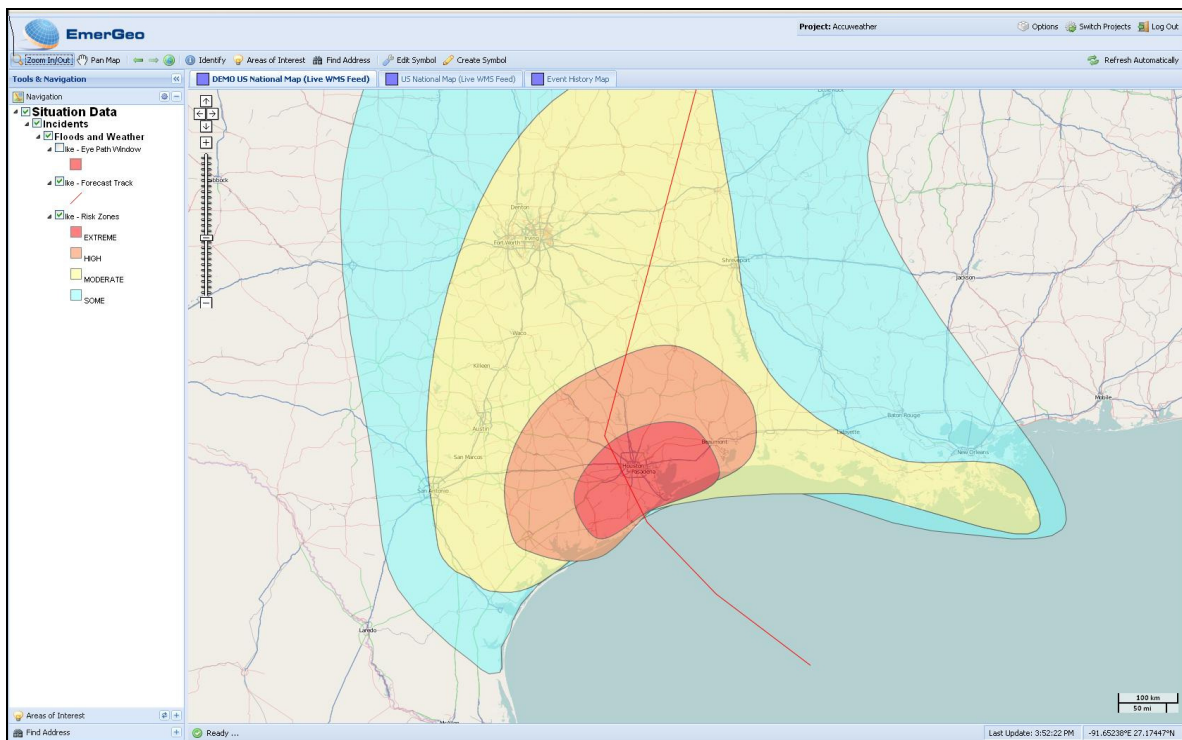

EmerGeo Solutions Teams with AccuWeather, Inc.

Vancouver, B.C., - June 4, 2009 - EmerGeo Solutions Worldwide Inc. (TSX-V: EMG), a leading provider of emergency management, environment health safety, and security software and consulting services, is pleased to announce that it has signed an agreement to incorporate weather data and forecast information from AccuWeather, Inc., the world's leading multimedia weather information source, into its software and consulting services.

"Partnering with the leader in weather forecasting services was a natural for us", explains Mike Morrow, EmerGeo President and CEO. "This weather integration is an example of how we are fusing critical data from multiple systems and organizations to address the challenges of interoperability in our industry".

"We look forward to our partnership with EmerGeo," commented Paul Raymond, Director of Commercial Services for AccuWeather. "This will allow EmerGeo's current and future global clients in emergency management, environmental safety, and security markets the ability to leverage the geospatial environment with application programming expertise and the seamless integration of real-time, on-demand weather content".

EmerGeo's crisis management software, now integrated with AccuWeather's weather data, allows disaster response personnel to have full situational awareness for the impact of weather on emergency operations. Real-time updates fed into EmerGeo software help organizations assist their employees, the public and other businesses in a timely and effective manner.

EmerGeo's clients will be able to subscribe to customized weather packages including:

- Current weather conditions from over 15,000 weather sensors;
- Real-time severe weather alerts and warnings for the United State and Canada; and,
- Detailed, highly localized forecast data (e.g. hurricanes, storm surge, rainfall, wind gusts, etc.).

EmerGeo plans to make this weather data subscription service available during the summer of 2009.

About EmerGeo

EmerGeo develops, integrates, resells and supports emergency management software solutions and services. EmerGeo's software provides optional interfaces to crisis management, hazard modeling and simulation systems, giving users an ability to visualize their incident, resources and other critical data on electronic maps to help government and industry to mitigate against, prepare for, respond to and recover from potential or actual incidents, natural disasters, acts of terrorism, or other major events.

About AccuWeather, Inc. and AccuWeather.com

AccuWeather, Empowering You to be the Best™, presents accurate, localized, branded forecasts and severe weather bulletins to over 110 million Americans each day via the Internet, mobile devices and IPTV, through the airwaves, in print and on digital signage.
